

ASH HOUSE  
STAINES

Office to residential conversion  
41 apartments created

CLIENT  
Aberdeen Asset  
Management

Located in Staines-Upon-Thames, this development for Aberdeen Asset Management utilised the 'Permitted Development' provision for a change of use class allowing for the conversion of a 1970s office building into 41 high end residential apartments for sale.

Changing the appearance of this brick clad commercial building was the biggest challenge which was managed through increasing the size of glazed openings with large balconies attached to the building façade to provide each apartment with highly sought after private amenity space.
