

ENERGY FROM WASTE
BILLINGHAM

Phase 1—100,000sqft

Phase 2—45,210sqft

CLIENT

Impetus Waste Management

This flagship development facility for Impetus Waste Management was designed and built to house waste processing equipment which will recover recyclable materials and produce a refuse derived fuel (RDF) from commercial industrial and household waste streams.

Phase 1 comprised of the construction of a new 100,000 sq ft warehouse with associated external works.

Phase 2 comprised of a 45,210 sq ft extension to existing industrial unit including associated external works.
